PROFESSIONAL SUMMARY

Data Analyst with 4+ years building reporting and dashboard solutions for government, healthcare, and life sciences organizations. Specializes in Power BI, SQL reporting, and advanced Excel, with a record of replacing manual processes with automated workflows, documenting systems, and training non-technical users. M.S. in Data Analytics, Clark University.

CORE SKILLS

Reporting & Business Intelligence: Power BI (DAX), Power Query, Tableau, Looker Studio, Advanced Excel (VBA), Dashboard Design, Data Storytelling

Data Analysis & Querying: SQL (MS SQL Server, PostgreSQL), Python (Pandas, NumPy), Data Wrangling, Trend Analysis, Statistical Modeling, Forecasting

Business Systems & Collaboration: Microsoft 365, Jira, Git, Salesforce, Requirements Gathering, End-User Training, Technical Documentation

Governance & Project Delivery: HIPAA/GDPR Compliance, Data Governance, Data Lineage, Audit Reporting, Standard Operating Procedures, Agile/Scrum, Process Improvement, Workflow Automation

Additional Technical: Azure Data Factory, Snowflake, Databricks, AWS, Azure, Google BigQuery, Airflow, dbt, Alteryx, Scikit-learn

PROFESSIONAL EXPERIENCE

CGI Inc. | Arlington, VA

Data Analyst | May 2025 - Present

- Build and maintain automated Power BI reporting suites for federal government clients, converting raw operational records into dashboards leadership uses daily.
- Gather reporting requirements directly from non-technical federal stakeholders and translate them into dashboard specifications, validating outputs with users before release.
- Author technical documentation and data lineage records covering metric definitions and data sourcing, supporting 100% compliance across cross-departmental audits.
- Serve as post-deployment point of contact for report users, resolving data and dashboard issues and escalating system-level problems to engineering teams.
- Reduced data latency 25% by optimizing Azure Data Factory pipelines while maintaining 100% data integrity for mission-critical datasets.

Veeva Systems | Pleasanton, CA

Data Analyst (Contract / Remote) | August 2024 - April 2025

- Built interactive Power BI and Tableau dashboards tracking sales and clinical metrics, improving operational visibility for life sciences clients.
- Onboarded client teams onto new dashboards, walking users through metric definitions and navigation to drive adoption.
- Cut manual data preparation time 40% by automating recurring reporting workflows with SQL and Python.
- Documented data validation protocols across Salesforce and Veeva Vault, producing reference materials client teams used to sustain HIPAA/GDPR compliance.

Global Computers and Communication | Bangalore, India

Data Analyst | March 2020 - January 2023

- Developed and maintained 20+ Power BI dashboards for spend analysis and forecasting, improving financial data accuracy.
- Trained finance and operations users across all 20+ dashboards and produced user guides that reduced repeat support requests.
- Acted as first-line support for reporting issues, diagnosing data discrepancies and coordinating fixes with source system owners.
- Reduced operational overhead 15% by tracing process inefficiencies through messy, semi-structured data sources.
- Accelerated executive decision-making cycles 35% by automating legacy reporting flows with Python and SQL, documenting standard operating procedures so teammates could run and validate reports independently.

Defence Research and Development Organization (DRDO - SAG Labs) | Delhi, India

Data Analyst Intern | February 2018 - August 2018

- Executed 10,000+ optimization simulations and translated results into Power BI dashboards for senior scientists, accelerating research evaluation timelines.

EDUCATION

Master of Science in Data Analytics | Clark University, Worcester, MA | May 2025

Post-Graduate Diploma in Data Science | IIIT, Bengaluru, India | June 2023
